

THE ONLY MAKINO V56i PRO 5 IN TEXAS

Our leading-edge machine shop specializes in high speed precision prototyping, low volume production and hard-milling (HRC 70).

Expert machining services from the developer of the award-winning NuVinci[®] continuously variable planetary technology.

WHY CHOOSE US?

- Short lead times (expediting available) and attractive pricing.
- Highly skilled staff (100+ years of experience) utilizing exceptional equipment.
- ASME Y14.5-1994 and 2009 GD&T certified technicians with extensive ISO GPS experience dedicated to engineering drawing interpretation and consultation.

Exceptional machining equipment includes:

- Makino V56i (Fallbrook featured in Competitive Mold Maker magazine)
- Two Haas mills, Three turning lathes
- Standard shop processes including heat treat, welding and grinding

Fallbrook offers the same outstanding quality and valuable machining and metrology services that we deliver to our technology licensees, including Allison Transmission, Dana Corporation and other automotive suppliers.

"This is amazing stuff! Hard to believe you can get that good of a finish on the mill." - Customer testimonial
